

# PCon's ML Hackathon

## Chapter 2: Capture The Flag

- You have to find **cheatcodes** that are hidden somewhere.
- If you find them, you can find very nice solutions!
- Based on this, you must submit the CSV files in the same format as before.
- If you find the right solution, you have to submit it in the [same portal](#).
- **Only change you must do is in your Registration Number:**
  - Change '**ug**' in your registration number with '**pg**'.
  - Example: **2024ugee067** becomes **2024pggee067**
  - Name and Submission Key remains the same.
- You will again get three chances for each problem with the new registration number.
- **Do NOT submit CTF solutions with the same Registration Number as the ML Solution.**
